The Azonde 2200 family of fully integrated solar powered wireless water management systems for a wide range of water management applications

- 2210 EZ for bodies of water
- 2220 CRV for rural streams/ivers
- 2230 URBAN for urban streams/ivers

Software

- 2000 Win PC – self contained
- 2000 Gateway to internet
- 2000 Webserver

Readings are transmitted in real time to your computer or if internet enabled, to the web.

The Azonde 2210 EZ is a rugged device engineered for water bodies, measuring

- Water height
- Water temperature

The all seasons integrated solar panel, wireless modem & antenna sit atop a rugged buoy that is anchored to the Azonde 2210 EZ through a tough cable.

Use for monitoring lakes or valuable irrigation ponds. The Azonde software can alert via email when a parameter is exceeded.
